

1 **ABSTRACT OF THE DISCLOSURE**

2 A socket has a housing for memory card such as MS card (Memory Stick Card),
3 SD card (Secure Digital Memory Card) and MMC card (Multi Media Card), SM card
4 (Smart Media Card). The housing is integrally formed to have a SD contact, a SD card
5 detect contact, a SD write protect contact, a SM contact, a SM card detect contact and a
6 SM write protect contact. Furthermore, arrangement of the different contacts enables the
7 operator to withdraw the memory cards which are securely inserted into the socket
8 easily to ensure the completeness and accuracy of read/write action.
